

Never seen before
simplicity & transparency
in a practice software

Who are we?

DokiforVets Cloud is the latest technology, fully cloud-based, complex practice management software that includes most of the features that make a veterinarian's daily work easier!

For veterinary practices keeping pace with digitalisation, cloud solutions are not just a trend, they are the foundation for efficient operations.

Learning and mastering the latest technologies is a particularly important aspect for us. With this knowledge, we strive to achieve the highest standards of professionalism in our work.

The versatile professional composition of our team ensures the management and monitoring of the entire software development process, as well as the establishment of a complete, stable IT and network background.

Visual Patient Monitoring

Track and visualize patient progress effectively

All data, one page

The patient's main record screen immediately displays the main data (species, breed, age, last vaccination date).

Instant Graphs

The patient's main record screen immediately displays the trends in body weight and (if recorded) temperature on an easy-to-read chart.

Quick data edit

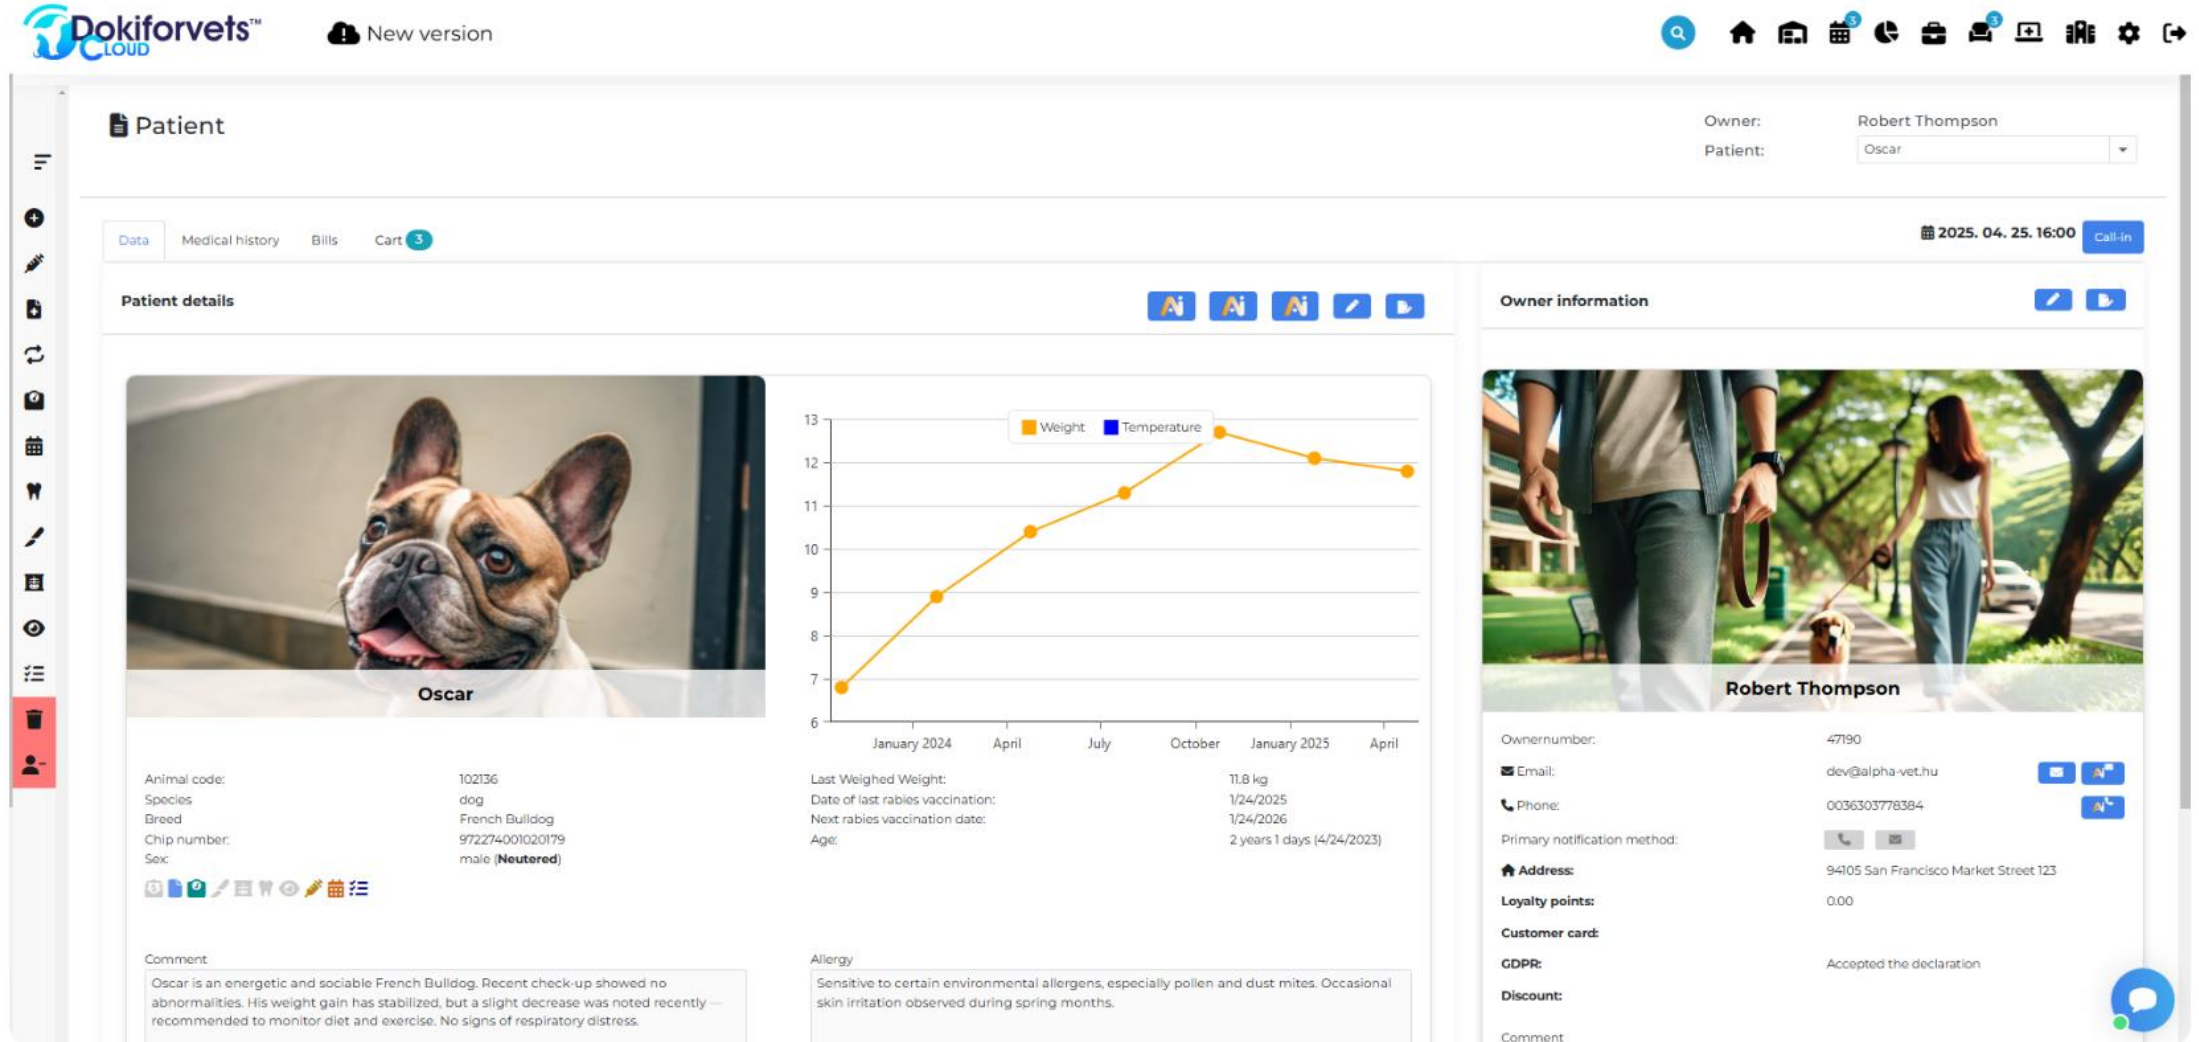

These data can easily be modified on this one page.

Benefits

Enables rapid assessment.

Clearer communication: Easy communication with the owners about the data changes.

Clear & transparent visualization

Comprehensive Patient Records

Voice Dictation

Speed up note-taking! All text fields can be filled using dictation on phones or tablets.

Structured Interface

Dedicated sections for comprehensive recording of clinical data.

Anamnesis (History), Symptoms, Treatments (via items added to the Basket)

Diagnosis, Notes (General and Private, visible only to vets), Follow-up Appointment Scheduling

Document Attachment

Easily attach relevant files (lab results, X-rays, external reports, etc.) directly to the patient's medical record..

Benefits

Accurate, comprehensive, and easily searchable documentation.

Time savings through dictation and AI summaries/suggestions.

Support for better-informed clinical decision-making.

The New Client Card Experience

We're introducing a modern, efficient way for you to manage your details and check in for your pet's appointments using our new client card system.

Client Card System

Fast identification at reception via barcode/QR code scanning using a tablet or dedicated scanner.

- Quick registration for new clients
- Simple verification of existing data
- Easy addition of new pets

Self-Service Data Entry

Clients can easily enter or update their own details and their pet(s)' information directly on a tablet.

- User-friendly interface
- Immediate data updates
- Reduced administrative workload

One Card, All Pets

Your client card links all your registered pets under your name, simplifying management.

- Unified pet profiles
- Easy access to all records
- Streamlined check-in process

Benefits

Faster Check-ins: Spend less time at the reception desk.

Accurate Data: Easily keep your contact and pet information up-to-date.

Convenience: Manage multiple pets under one profile effortlessly.

Streamlined Process: Helps us focus more on your pet's care.

AI-Powered Intelligence

Increase efficiency and enhance communication with Artificial Intelligence support

Medical History Summary

The AI analyzes the patient's past medical records to generate relevant summaries:
Quick overview of patient history, Relevant past treatments, Previous medications and outcomes

Treatment Suggestions

Intelligent recommendations based on patient data:
Upcoming vaccinations, Parasite treatments, Recommended follow-up checks

Client Communication

Enhanced client interaction tools:
Automated reminder generation, Treatment plan summaries, Easy-to-understand reports

Comprehensive Billing & Tax Compliance

Simplified, flexible, and regulation-compliant billing processes

Basket System

Easy product and service addition

Automatic price calculation, Flexible discount management

Document Creation

Treatment summaries, VAT-compliant invoices, Multiple payment methods

Tax Compliance

Automatic tax reporting, Integration with tax authorities, Complete financial tracking

Efficient Inventory Management

Maintain control over your stock and minimize losses

Stock Control

Real-time inventory tracking, Multi-warehouse management, Automatic stock updates

Expiry Management

Expiry date alerts, Batch tracking, Loss prevention

Reporting

Detailed movement reports, Stock valuations, Usage analytics
